VICENTE ZURITA

ANALYST PROGRAMMER

ABOUT

26 years old, Santiago, Chile.

Analyst Programmer student in his last year at DuocUC.
I've done previous studies regarding programming and foreign languages.
Thanks to these experiences i have focused my studies in the IT area, being able to analyze, design, develop, implement and ensure the continuity of computational systems, watching over the correct functioning of said systems and applications, proposing ideas to improve and adapt existing ones.
Quick to learn and adapt, I'm experienced in the resolution of problems and working under pressure. This has lead me to act as Project Manager in all groups and projects i have taken part into during the career, achieving good results and grades in all of them.
I have done all kinds of work from being a waiter at big events to translator for an artistic organization to PL-SQL teacher, this has given me experience in all kind of different areas aside of programming, and has helped polishing my interpersonal skills.
I'm looking forward to develop my career in the FrontEnd aspect of web development, but my principal and foremost interest is to learn new skills and grow as a professional, one that has my interest in mind at this moment is React, now that I'm finishing with my study program at Duoc i can put my mind into extra skills and languages to learn.
